**How is dental readiness determined and why is it important?**

The dental fitness classification is the primary measure of a Soldier's dental readiness. The commander can use the dental fitness classification of unit personnel as an index of dental preparedness and to identify individuals who will require treatment during mobilization. The Army Selected Reserve Dental Readiness System (ASDRS) provides dental treatment for Class 3 AR Soldiers, and annual exams for ALL AR Soldiers outside of mobilization. The DOD Dental Classification Guideline and AR 40-35 outline the following dental fitness classifications:

**Standardized Dental Fitness Classifications\***

- Class 1:** Worldwide Deployment with no further treatment required.
- Class 2:** Worldwide Deployment with need for non-urgent routine treatment.
- Class 3:** Nondeployable without treatment for urgent conditions that likely will cause a dental emergency within 12 months.
- Class 4:** Nondeployable with no examination documented within the past 12 months.
